Sound Quality

The BeatBuddy Mini sounds best when played through a full-range neutral sound system.

Many guitar and bass amps are either not full-range (they muffle the higher frequencies) and/or provide distortion, which lowers the BeatBuddy Mini’s sound quality.

Acoustic guitar amplifiers, PA systems, and home stereos tend to be neutral & full-range.

Tip: Plug BeatBuddy Mini in your amp's or home stereo’s auxiliary jack if available.

Headphones adapter

Use the included adapter to convert the BeatBuddy Mini’s 6.35mm mono output jack to a 3.5mm stereo headphones jack.
The BeatBuddy Mini does not change your instrument's sound.

The input jack lets you plug all of your pedals into the same sound system, no mixer necessary.

The volume knob only controls the BeatBuddy Mini's drums. It does not affect the volume of any instrument plugged into it.

If you are plugging in other pedals, the BeatBuddy Mini should be last on the pedal effects chain, after the looper, so that its sound isn't affected by your other pedals.

You do not need to have an instrument plugged in for the BeatBuddy Mini to produce sound.
A light indicates whether you are selecting Genre, Song, or Tempo, all of which you control with a single knob.

1. Choose one of BeatBuddy Mini's 24 genres by rotating the knob. Select by pressing down on the knob like a button. The green light advances from “Genre” to “Song”.

Selecting a Song
2. Twist knob to scroll through songs within a genre. Each song’s time signature and default tempo are displayed on the bottom row.

**Changing Tempo:** To change the tempo, press the knob again. The green light advances from “Song” to “Tempo”. Adjust the tempo by rotating the knob.
Controlling the Beat

Start: Begin song by tapping the pedal. The song starts with an intro* fill, just like a real drummer, and then goes to the verse, which loops as long as you'd like.

Fills: If you want a fill, just tap the pedal any time, and a fill will play, perfectly in time.

Transition: To transition to the chorus, hold the pedal down for as long as you'd like the transition beat to last.

Chorus: When you’re ready to start the chorus, let go. The chorus beat loops as long as you like. Return to verse the same way you transitioned to chorus.

End: Whenever you want to end the song, double-tap the pedal to end with an outro fill.

*Intro setting: Hold down right knob. Twist to "on" or "off". A dot is displayed by tempo when intros are off.

Additional Control!

With the Official BeatBuddy Footswitch, select genres & songs, change tempo, add accent hits and drum breaks anytime — creating a powerful, realistic live effect, all totally hands-free.

Accent hit (e.g. a cymbal crash)
Accent hits vary by song and sometimes even by song part

While no song is playing:
- Hold down to select Genre, Song or Tempo
  - Genre: Tap once to move to next genre
  - Song: Tap once to move to next song
  - Tempo: Tap tempo mode

While song is playing:
- Pause/Unpause

Only the Official BeatBuddy Footswitch is compatible with the BeatBuddy Mini.

Sold separately at your favorite dealer and at myBeatBuddy.com
Need Even More?
